

REMARKS/ARGUMENTS

Certain changes are made to correct the specification. With respect to these changes, applicants note the following:

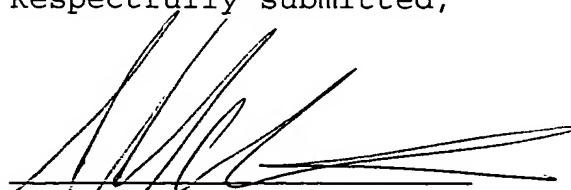

(i) Page 8: The reaction scheme is amended to specify the correct catalyst as in the description immediately following the reaction scheme.

(ii) Paragraph bridging pages 115-116: The addition of a subscript 3 to Alq<sub>3</sub> and subscript 2 to Znq<sub>2</sub> reflects the compound name. Thus, "tris" means 3 and "bis" means 2.

(iii) The changes on the following pages remove discussion not relevant to the Tables to which they refer: 140, 142, 143-144, 145, 147, 148, 150 and 151.

Entry of this AMENDMENT and a favorable action on the merits are respectfully requested.

Frishauf, Holtz, Goodman  
& Chick, P.C.
